Allpro RMM

KEY FEATURES

Enterprise Class Solution
Encompassing more than just anti-virus, our solution supports full endpoint security.

Proactive Approach
Comprised of advanced technologies that can detect and deploy the latest security patches and let us know which PCs have missing patches.

Monitor Hardware Details
Our detailed hardware monitoring solution allows us to inform you about possible computer hardware issues, before your computer has a complete failure.

Transparency via Detailed Reporting
A wide range of reports are provided monthly to ensure you have visibility into the management of your environment.

Fully Monitored System
We monitor your entire PC environment to ensure it remains healthy and protected and will act immediately if there is an issue.

Four Full Time Technicians
Allpro Technology LLC has four full time technicians on staff to ensure your IT issues are always resolved in a timely manner.

THREATS FACING SMBs TODAY

- Email Worms
- Network Viruses
- Spyware
- Data Theft
- Phishing Attacks
- Ransomware
- Email Spam and Malware
- Security Threats
- Unexpected Hardware Issues

Complete Workstation and Server Protection for Your Business

Allpro Technology LLC provides your organization with complete workstation and server protection that acts as the first line of defense against viruses and security threats as a result of outdated Anti-virus software and unpatched systems. We will also ensure that your critical files and folders are continually being backed up* and protected in the event of a user error, PC failure or natural disaster. Our #1 goal is to keep your PCs safe and your employees productive.

All at a price that is easy to budget for.
**Backup service option is required for backup process and backup monitoring*

Every minute counts in today's fast-paced business environment. Stop wasting your valuable time and energy on the planning, selection, deployment, testing and updating of your Anti-virus software. Don't leave the safety and security of your network environment in the hands of your employees by holding them responsible for keeping their backups and PCs up to date with the latest Windows and 3rd Party software security patches. Your employees should focus on their daily job versus managing their workstation.

Benefits of Our Core Workstation Solution

- **Leverage Our IT Expertise and Experience!**
  You and your employees have more important things to focus on, and the ongoing safety and security of your PCs shouldn't have to be one of them. Leverage our AV Defender solution for maximum protection and insight.

- **Reduce Operating Costs**
  One security incident or an unpatched workstation can stop your employees from being 100% productive, which will affect your bottom line. A virus can hit many machines and take weeks to eradicate. By removing this risk, it will save you money!

- **Protect Your Company's Critical Assets and Information**
  Combining our award-winning AV software with our patch management solution will ensure an additional layer of protection for your workstation environment. We will ensure that all of your Microsoft applications and platforms, as well as your 3rd Party applications remain up to date with the latest patches.

- **Keep Employees Protected and Safeguard Their Important Data Files**
  We all make mistakes and accidently delete an important file or email, or misplace or have a laptop stolen. With our Managed Backup solution, we can recover your missing information, or restore your data to a new laptop and get you pack up and running in no time! *(Requires backup service option)*

"We have been using Allpro RMM service for the past 14 months. For years, we had done backups on our systems, and we just prayed they worked. We had no idea if they had or not. We stressed wondering if ransom ware could get us. We are car guys not tech guys. We signed up with Allpro and now we get reports showing all backups have been completed and we feel much safer. If any of computers starts showing a problem, they are on the phone warning us of a problem. Our employees also know someone is watching where they are going on the web, so from a compliance standpoint, we feel much better. If we have any computers go down, their techs are on it immediately. We have been very happy with our service from Allpro."

Why our clients choose our Core Workstation Solution

Peace of Mind:
- Prefer to leverage our IT expertise to ensure their PCs are:
  - Continually protected against viruses and malware attacks and that the AV software will never expire or be out of date.
  - Continually kept up to date with the latest Microsoft and 3rd Party security updates and software patches to protect against security breaches and vulnerabilities.

Reduce Risk & Maintain Productivity:
- Our optional Managed Backup solution reduces risk by preserving critical data and maintaining productivity levels through quick recovery and restore in the event of user error, system failure or disaster.

Transparency & Accountability:
- Through 24x7 monitoring of your workstation environment and comprehensive reporting, we are committed to providing you with the latest performance metrics.
